

## Wild explorers!

Greenspan were pleased to have a significant part to play in the construction of Marwell's biggest exhibit to date - Wild Explorers. Our main works were the construction of the large themed Millboard boardwalk that allowed guests to travel around the exhibit. Greenspan were also engaged to supply and install the Rhino-proof fencing around boundary.

During the build of the new Wild Explorers area at Marwell Greenspan were engaged to design and install a children's play area, in keeping with the wild explorers theme.

Notably Greenspan were awarded the approved installer status from Millboard on completion of this project.
