OUTDOOR GOLF

Treasure and pleasure.

Bournemouth Council chose Greenspan to develop a concept, for a uniquely themed adventure golf, based on the history of smuggling in Bournemouth.

We undertook a challenging detail design process, and turnkey installation which included a lake, large waterfall feature, bespoke structures, themed obstacles and the use of a specialist lightweight aggregate to build up the golf holes, due to weight loading restrictions.

Greenspan were able to use a huge variety of materials, including reclaimed groyne timbers provided by the council, to achieve a fantastic outcome for the client which was a success from the minute it opened!

Greenspan is proud to have successfully completed this stunning 18-hole Adventure Golf course. It's located next to Fairhaven Lake and offers so much fun for all ages.

The course is themed on area history, famous landmarks, and local wildlife. Some of the iconic landmarks include St Annes Pier, The Royal Lytham Hall, Singleton Fire Station and more.

The course also features some of the famous signature holes from St Annes Old Links and Royal Lytham & St Annes golf clubs. Detailed wooden sculptures and sculptures.

SPECIALIST FEATURES:

- Large central lake & water features
- Local landmark theming
- Bridges, models & near life size props
- Multiple challenges & hole-in-one opportunities
- Large kiosk and cafe booth
- Realistic wood carvings with sound FX
- Seating, fencing & low-level lighting
- Hard & soft landscaping
- Large operation Kiosk and conveniences

APPROX VALUE: £500,000

Greenspan is proud to have successfully completed this stunning 18-hole Woodland Adventure Golf Course for China Fleet Country Club in Plymouth. As you can see, it is a stunning course with some excellent woodland theming.

Expertly carved wooden sculptures, multiple challenges and obstacles to conquer, streams to navigate on a swaying raft and magical talking trees all add to the excitement of this course.

China Fleet were very impressed with the overall design and installation process.

SPECIALIST FEATURES:

- Detailed wooden sculptures and sculptures
- Play through props
- Multiple challenges and obstacles
- Excellent playability
- Ride on raft
- Large water feature with multiple levels and weirs
- Sound FX and night time lighting
- Hard and soft landscaping

APPROX VALUE: £220,000

Pitch perfect.

Fontygary is a growing leisure and food and beverage hub on the edge of a holiday park in Rhoose, near Cardiff Airport.

Their desire was to create a Welsh themed adventure golf to their portfolio of leisure attractions which currently includes a Gym, Pool, Bowling alley, function rooms and an eatery/bar.

Greenspan designed and built a large Dragon (with glowing eyes and a smoking nostrils) as well as a castle, mine shaft and an impressive water feature amongst the challenging but fun 18 golf holes.

Putt your best foot forward.

Greenspan were engaged to design and build this delightful nautical themed 9 Hole seaside crazy golf course.

Works included themed timber carvings, Landscaping, timber walk through features, precast kerb edgings, and bespoke signage.

Due to the high traffic environment during the summer season, this was designed and built to a durable, and high quality standard.

"Ahoy there mateys."

We recently helped realise Pirate Bay, a swashbuckling coastal golf adventure in Malden, Essex.

Featuring 18 holes and a wide variety of dastardly props such as a snarling shark head, a full size galleon to play through, a tiki-hut and cannon that regularly blasts at marauders, a ghoulish graveyard and crew recruited from the decks of the Black Pearl.

A good dose of landscaping featured too, in classic golf fashion, including a beautiful waterfall, reams of rockwork and hardy planting.

Par for the course!

Crealy Adventure Park approached Greenspan to develop an crazy golf course to complement the their holiday park facility, within a modest budget.

We worked collaboratively to deliver the scheme and developed a very pleasant area, with a 'Fun on the Farm' theme, including farm characters, props, quirky hole signage and unique playability.

The scheme has been designed in such a way to enable a comprehensive planting scheme and a water feature with a stream to be installed at a later date.

SCOPE OF WORKS:

This project included many features:

- Full concept and detailed design package
- Planning
- 9 Hole Adventure Golf Course Construction
- Groundworks
- Resin Bound and Block Paving Surfacing
- Natural Theming and Timber Features
- Low Level lighting
- Signage
- Landscaping
- Fencing

VALUE: £120,000

Off to a tee.

We were approached by Haven Holiday Parks to upgrade a dated mini golf course at Weymouth Bay.

We designed a budget friendly concept that could be rolled out across multiple parks, and secured 3 initial projects for a fastrack roll out in the space of 6 weeks

The final result made a huge improvement to the park, bringing the mini golf on brand, increasing vibrancy, and creating unique and family fun playability on each hole.

INDOOR GOLF

Aztec adventure.

An incredible 36-hole indoor golf experience, players enter course through the remains of an aeroplane fuselage and follow a perilous journey through an exotic jungle and ancient Aztec ruins.

An extensive array of tropical plants surrounds each hole, while bamboo Tiki Huts, a windmill, smoking volcano and sound effects all add to the dramatic atmosphere.

The course features a number of putting challenges varying in difficulty, providing entertainment and playability for all the family.

A space odyssey

Greenspan were engaged to produce the concept design for Mr Mulligan's Space Golf in Newcastle, following a successful completion of a similar project in Cheltenham.

This turned out to be an exciting, futuristic, immersive and interactive mini-golf adventure for the whole family to enjoy.

'Space' and the 'space race' are the core narrative, with guests competing in three exciting nine-hole golf courses through different retro-futuristic environments.

Taking a mulligan!

We worked with Adventure Leisure on their brief to create a fully themed indoor adventure golf attraction, set within an retail/restaurant complex. Key considerations included the need to create an attraction that was fully in-keeping with the Mr Mulligan brand and one that was fully immersive.

We used our extensive master planning experience to create the entrance lobby, landing area, reception and all 36 holes, developing an engaging storyline based around the character Mr Mulligan and his gloriously exciting adventures and creations, while providing varied playability around the course, with theming and story choices drawn from classic literature and the golden age of exploration.

The theming and visual design process was intricately developed from initial sketches through to full 3D renders, taking into consideration the key sightlines around the course to provide visitors with a fully themed experience, and an immersive sense of discovery as they weave their way through the underwater and jungle landscape.

Theming elements include UV lighting effects, detailed rockwork, water and smoke effects, providing a true element of surprise around every corner. One course is fully DDA compliant.

The island of adventure.

This project for Paradise Island Adventure Golf, is located at the newly developed Barcode Leisure complex in Plymouth.

Within this incredible 36-hole (2 x 18 hole) indoor golf experience, players enter course through the remains of an aeroplane fuselage and follow a perilous journey through an exotic jungle and ancient Aztec ruins.

An extensive array of tropical plants surrounds each hole, while bamboo Tiki Huts, an eerie cave, feature lighting and sound effects all add to the dramatic atmosphere.

The course features a number of putting challenges varying in difficulty, providing entertainment and playability for all the family.

Crazy Captains!

Haven briefed Greenspan to come up with an enticing indoor adventure golf concept for the latest renovation at their at Craig Tara resort.

Following the existing branding and interior themes at the site, we came up with a concept to fit in with the Haven aesthetic; combining a palette of pastel colours, warm natural timbers reminiscent of weathered driftwood. Add to that a contemporary take on the classic, retro, quintessential British seaside traditions.

We settled on a standalone design, borrowing features from a selection of recent Haven projects, tastefully incorporating the nautical and coastal themes to create a high quality and immersive course.

Complex and fascinating features on each hole, combined with top level playability provide Haven holidaymakers with a unique and memorable experience.

OUTDOOR PLAY

Greenspan won the tender and was chosen to design and build this quality Robinia hardwood, natural timber playground for Gaydon Parish Council. The works included installing access pathways and gates, all bespoke adventure play equipment, slides, swings, zip-wire, hard and soft landscaping and more.

The residents were very pleased with the professionalism of the Greenspan install team and say the area will provide local children with necessary exercise and excitement for many years to come.

SPECIALIST FEATURES:

- Large 30m zip wire (aerial runway)
- Multiple swing sets
- Large twin play towers with rope crawl tunnel
- Climbing walls
- Large tube slide
- Toddler play area
- Pathways and seating
- DDA compliant tables and benches

APPROX VALUE: £120,000

Woodland wonderland.

Yorkshire Wildlife Park briefed our team to create an engaging and fascinating forest playscape to replace their existing feature and improve play value.

A combination of tall towers and tree top platforms, connected with various interlinks, clatter bridges, box nets and bridges and beams provide multiple climbing opportunities and challenges, designed to excite and build confidence, while tube slides bring them back down to ground level.

"Greenspan envisaged the initial design brief well with a completely bespoke design with high play value; The project lived up to our visual expectations brilliantly. A couple of issues on the construction phase came up however Greenspan were always responsive to concerns raised."

Laura-Anne Innes
Project Manager
Yorkshire Wildlife Park

Castles in the air.

Robin Hood's Wheelgate Park, briefed us to create a destination play area connected with the theme Robin Hood.

We visualized, designed and built one of the most exciting outdoor play structures in our portfolio with over 10 connected play towers, some themed as a castle and some themed as a woodland, one as much as 14 metres high!

With multiple levels, connections, and 3 amazing slides, this is truly one of the most exciting play spaces in Robin Hood Country!

In Robin Hoods lair several themed props

Main connecting bridge consist of large climbing net

Main castle tower

Sandplay ditsch

Forts and fleets.

Hampshire County Council's Queen Elizabeth Country Park is set within the picturesque South Downs near Petersfield, Hampshire. Greenspan have been working with Hampshire County Council to undertake some exciting improvements at Hampshire's largest country park as part of the 'Forts and Fleets' project.

Funded by Hampshire County Council's Country Parks Transformation Programme and the Armed Forces Covenant Fund, 'Forts and Fleets' aims to bring military and civilian communities closer together through a shared love of nature and the great outdoors.

The project uses a broad range of themes, including play, physical fitness, and dogs to appeal to different people across both communities.

We love to create bespoke outdoor spaces so we were really excited to be involved in such a great project! We've been working on four main areas including a new play space, assault course, community space, and a dog agility trail.

A great place to hangout.

Paignton Zoo were impressed with Greenspan's creative design response to their brief for the new Hangout play area. This was to create a rustic play area styled to look like a primitively built jungle lookout tower.

We ensured the design appealed to a wide age range with lots of play value, including a unique play trail linking the towers, lots of rope play within the towers, two exciting slides, and hand-carved animal springers.

It was built from UK-sourced chestnut timber, which gave it a lovely appearance, alongside the new 'snack shack' cafe.

Elephantastic!

Noah's Ark Zoo Farm had a very special request for Greenspan. "Create an Elephant Butt slide" So we did.

Greenspan saw the design from initial concept through to structural calculations and detailed designs, and used specialist contractors to create one of the most eye catching play structures ever seen in a zoo!

After carving huge blocks of polystyrene, formed around a steel frame, we then used concrete render to create the elephant's form, finished with a first class scenic painting job.

The client has been very pleased with the final outcome, and the play structure has been a major success with their visitors.

Down on the farm.

Mead Open Farm wanted to transform their existing play area to create the wow factor, and cope with large volumes of children on peak days.

We created three large 6 metre diameter towers, connected with multiple rope bridges, and three adventurous slides, as the central feature, with many other ancillary play items around the play space including swings, play trails, playhouses, tunnels, and mounds.

The end result met the clients brief perfectly, soaking up hundreds of children into the play space (and dare we say) setting a new expectation in the farm park community.

Learning the ropes.

The Zoo's brief was to replace a poorly performing and dated play area, with a new destination adventure play park, which had to be incorporated within a landscape setting with differing levels.

The new play space was designed to include for all ages and abilities and had to provide up to 2 hours dwell time halfway through an animal safari. Inclusive play was also an important factor, and the play area was built around a central pathway connecting two key areas.

This play space contributed to a significant growth in visitor numbers in the following months.

The great outdoors.

Hall Hill Farm is a family run 700 acre working farm which attracts in excess of 60k visitors a year. The farm offers a number of attractions including animal encounters, tractor rides, crazy golf, a tea room and play opportunities.

The farm park's brief was to replace a very small, modular play structure with something striking, using height and character to provide the ultimate wow factor.

Play value and challenge was extremely important, ensuring that the structure offered something for both younger and older children. The multi-level, four tower structure provides a series of routes and slides to excite and challenge children.

The bespoke structure, hand-crafted from robinia, is in-keeping with the farm's ethos and rustic surroundings.

Zoo logical.

After an unfortunate fire at London Zoo, Greenspan were involved as part of the rebuild process, in designing and constructing a new play space, and animal encounters area adjacent to some small animal enclosures and a food and beverage outlet.

This included a themed play ship and play trail, a climbing wall, carved animal rockers, a hot air balloon photo opportunity, refurbished splashpad, and a bespoke feature tree for animal demonstrations.

Our scope of works included resurfacing of the area which was a combination of artificial grass and rubber crumb wetpour, creating a vibrant and visually engaging play space in addition to the amazing play value we created.

Pirate tots.

Greenspan were commissioned to deliver this cute little outdoor play project as an addition to some existing play.

It has a very subtle pirate theme, which ties in with the pirate ship already on the site, and caters for younger children and toddlers.

Manufactured from Robinia Hardwood, this play area includes a play trail, 2 playhouses, a stainless steel slide which works with the topography, and a small crawl through barrel.

This project was installed simultaneously to the adventure golf project we designed and built at Fontygary, and complements the outdoor seating area beautifully.

Just the ticket.

Greenspan worked with the Duchess of Rutland to create a small but extremely desirable play area to accompany the newly launched and restored, high end retail outlet at the Belvoir Castle 'Engine Yard'.

We chose Steam engine Locomotive theme to celebrate the nearby railway, and also the steam powered engines that would have been used at the historic Engine Yard to make furniture and windows for the castle.

The scheme was created using hardwood Robinia, beautifully crafted and then painted to achieve the end result.

A lark at the park!

With a brief to create a completely bespoke, unique, and iconic adventure play area to really excite visitors, Wellington Country Park enlisted Greenspan to realise their vision.

Wellington Country Park is set within 350 acres of beautiful park lands, offering a vast array of family orientated activities and attractions.

The country park needed to be able to offer a higher capacity adventure play area to meet increasing demand, they also wanted to enhance their offering to their existing visitor base.

Key elements of the brief required adventure play that offered challenge and play value across the age range of 2 -8 years, had longevity, a unique design with the 'wow' factor, natural and in-keeping with the surroundings.

This stunning adventure play design, hand-crafted from robinia provides a real wow factor whilst managing to sit beautifully within the natural woodland surroundings.

Dig this!

Set within a 15m² space the 'Dino Dig & Splash' play area shows what can be achieved with creative design and planning.

Greenspan worked with Lee Valley Park Farms to create the themed sand and water play which features a Fossil Dig Zone providing opportunity for families to test their archaeological skills and experience the prehistoric age as they excavate 'ancient bones'. Other features include an elevated water pump station, water channel with hump back bridge, log crossings and a large sand factory.

With a brief to redesign their old sand play area, Lee Valley chose to work with Greenspan following a tender process, achieving fantastic play value within a small budget.

The zones are surrounded by beautiful planting and natural theming elements, including cobbles and boulders to provide a stimulating, attractive landscape.

Tree-mendous fun!

On recommendation from other farm parks, Bocketts selected Greenspan to design and build their new 'Treehouse Towers' adventure play area, set on a sloping bank, amongst some trees.

Each of the play towers carries its own unique identity with some very quaint roof details, and multiple connections between towers, including an access point from the top of the back.

The play space fits in beautifully with its surroundings, and has provided extremely popular with the farm's visitors.

Pod casts.

When Spring Barn Farm wanted to create a unique play space within a modest budget, Greenspan responded to the task with enthusiasm, and our usual 'can do' approach!

We created mini 'den like' pods on stilts, along with a little play trail, and some upturned trees to give a unique character to this play space.

We also installed a 35 metre zip wire on this project.

The play area met the brief perfectly, significantly improving the parks outdoor play offering, and proved very popular with the parks campsite visitors too!

Penguin Bay.

Greenspan worked with Chessington world of adventures and the Merlin magic making design team, to design and build a brand new Penguin pool, and display arena called 'Penguin bay'.

Using a combination of timber construction, artificial rockwork, landscaping, planting, glazing, and amazing theming including a crashed aeroplane feature, Greenspan delivered the scheme as a turnkey project on time and on budget!

The great outdoors.

Hampshire County Council worked with Greenspan to design and build a fully inclusive play space within the woods, at Royal Victoria Country Park.

This scheme included DDA compliant ramps and boardwalks, wheelchair friendly zip wires, rubbing plates, talk tubes, accessible slides and tactile carvings amongst many other features.

Greenspan were very proud to deliver an inclusive play space on this scale, enjoyed working collaboratively with the landscape and parks team at the council.

Who is the strawberry thief?

Looking to enhance its visitor attraction we worked with Lotmead Farm to help them create a bespoke, themed play trail for families to enjoy alongside the PYO.

The farm owner wanted to make the most of the relatively narrow space available to draw people from one end of the field to the other.

In-keeping with the farm surroundings and brand, the rustic, timber play trail offers varying degrees of challenge to engage both younger and older children. Old farm tools and props can be found along the way, adding interest to the trail at varying heights and elevations to achieve a more immersive experience.

Storytelling signage encourages children along the trail where they will encounter a range of climbing features.

The play trail was created on a relatively low budget, highlighting the benefits of bespoke design and build in terms of developing a

Giggly park - just for laughs.

We worked with both West Midland Safari Park, and Pesky Productions to bring Boj's Giggly Park to life.

Key elements of the brief included the use of natural materials to create an 'upcycling' theme whilst still remaining colorful and in tune with the IP. It needed to incorporate earing through play, encouraging curiousness and feed imagination. It also needed to stimulate the sense with fragrant, tactile planting and audio features.

The fully immersive, multi-sensory, themed play area features five interactive zones specifically designed for young visitors. Set over approximately 1500sqm, young explorers can make their way through the winding tunnels of Boj's burrow, make some magical music in Denzil's Music Mayhem area, hop over the stream and explore the sensory trail in Mia's Ladybird Spot, burn off some energy running and jumping in Rupa's Superfit Challenge, and climb, swing and bounce in Gavin's Giggly playground!

We drew on our brand IP experience to ensure that the play area was meticulously designed to fit in with the Pesky Productions Boj brand.

Don't get stuck in a jam.

Following a similar style as The Strawberry Thief Trail, combining contemporary elements while incorporating classic touches of rustic farming equipment, The Berry Plant fits in perfectly with the natural surroundings, whilst having a curious machine-like quality.

The rusty cogs and pipes appear to be where the jam is made from fresh berries, while berry juice seeps and oozes from cracks in the woodwork!

The Berry Plant features a variety of challenging climbing routes of varying difficulty, taking children up to the platform at the top of the structure where they can enjoy views of the farm using the telescope or peep hole window, or ring the bell if they spot any birds threatening the berries. The route down is via a tall steel slide, taking caution to avoid hot jam!

"Our phase one adventure play development The Strawberry Thief Trail has proved to be a great success, so of course we invited Greenspan back to design and build phase two; The Berry Plant. We didn't want to go down the off-the-shelf route, so we asked for a unique, exciting and interesting design to our farm on the map and we couldn't be happier with the result. We've already seen a substantial return on our investment".

Norman Parry, Lotmead Farm

Trail of the Kings!

Greenspan were engaged to create an immersive Journey through the jungle and get a close-up look into the world of the fascinating Western Lowland Gorillas, Asiatic Lion, Carpathian Lynx, Bush Dogs, Binturongs and Fossa.

Works included themed signage, new artificial rockwork archways, imprinted concrete pathways, new viewing windows and interactive elements.

Wild explorers!

Greenspan were pleased to have a significant part to play in the construction of Marwell's biggest exhibit to date - Wild Explorers. Our main works were the construction of the large themed Millboard boardwalk that allowed guests to travel around the exhibit. Greenspan were also engaged to supply and install the Rhino-proof fencing around boundary.

During the build of the new Wild Explorers area at Marwell Greenspan were engaged to design and install a children's play area, in keeping with the wild explorers theme.

Notably Greenspan were awarded the approved installer status from Millboard on completion of this project.

Fun on the farm!

The brief was to create an exciting and unique standalone play structure to fit in alongside the existing outdoor play apparatus and natural farm park surroundings.

This multi-level castle shaped structure is suitable for children of all ages, and designed to capture the imagination, with tall flag-topped turrets connected by a number of ladders and walkways, all safely enclosed with a combination of wooden planks, poles and rope netting. Entry and exit points are provided via a variety of climbing walls, stepped ramps with rails and ropes, or the choice of either a low-level or super high curvy slide.

The objective was to produce an exciting and challenging adventure play area that could be used by children from age 3 to 10. We wanted something unique that would also blend in with the character of our farm park. I am delighted with the result. The new structure looks amazing and certainly adds to the already fun filled family day out we offer at Finkley.

Charlie Waters, Owner Finkley Down Farm

INDOOR PLAY

Outdoors in!

We worked with the West Lodge Farm Park to regenerate their barn into an indoor play attraction.

The brief was to bring British woodland indoors. Our dedicated design team created an immersive, fully themed playscape which features an outstanding centrepiece - a giant hollow oak tree with an enchanting tree house looming from the upper branches.

The tree top hideout not only provides a brilliant vantage point and lookout, but also a giant spiral-slide down to the forest floor.

The centrepiece is surrounded by three zones allowing children to seamlessly flow around the playscape using net bridges, platforms, slides. Theming inspiration was taken from local farming connections, including young tree saplings, fruit harvesting, and natural, local stone quarrying.

The forecast is windy.

Windmill Farm Park, is a brand new Farm attraction in Kibworth Harcourt. They selected Greenspan as their adventure play design and build partner because of our creativity and willingness to create something special.

The name of the attraction derives from the real Kibworth Windmill which stands within the grounds of the farm.

Greenspan created a windmill play structure as the central feature within the indoor place space where you can turn the wheel of the windmill, hoist faux bags of grain up and down with a pulley , but thats not all...

We also created a labyrinth of play on three levels within what looks like 'old farm barns' which are packed with play value, including an exciting overhead net bridge, a twin lane wavy slide, a tubular slide, and many obstacles to maneuver around. The toddler play area is a very generous size, which includes an extremely popular play mound with a slide and tunnel.

This indoor play has been commented on as one of the best in the farm park community!

You'll be 'amaized'!

Amaizin adventure park selected Greenspan to deliver a vibrant and imaginative area where families play together and children gain confidence in a safe and clean environment.

This is the first indoor area to be built from timber in the Channel Islands, and is less about soft play and more about developing confidence, imagination and new skills. No electronics, just active play in a safe and well-maintained, purpose built space.

It offers an incredible labyrinth of play routes and obstacles, a drop slide, wavy slides, ball canons, a role play street, and much more!

A beautifully designed indoor area, perfect when showers are forecasted for the children in Jersey!

The owner of one of the UK's highest footfall farm attractions approached Greenspan to create a brand new Family Enjoyment Centre concept which includes themed indoor play and Unique F&B concept for young families.

'Flavour Forest' includes an enchanted mill structure with multiple play levels, rolling mounds with tunnels, overhead netplay in the trees, an exciting glacier slide from the Ice mountain and a truly magical ambience.

Greenspan worked closely with Cheshire Ice Cream Farm to deliver on their vision of Sticky Paws in the Flavour forest indoor play adventure play area.

SPECIALIST FEATURES:

- Realistic trees and foliage
- Exciting glacier play cave
- Detailed and intricate design
- Ice cream glacier slide
- High level bouncing nets and bridges
- Chocolate climbing wall
- Ice cream river pathways
- Fun multi-level playhouse
- Modern food and beverage areas

Shed loads of adventure!

Farmer Palmers approached Greenspan to design and build a role play farm village within an existing agricultural building, called 'Little Farmers Fun Barn'.

This attraction offers a farm-tastic opportunity for kids to let their imaginations run wild. Your 'little farmer's in training' can pretend to milk the cow, crawl through sensory tunnels, explore the farm house and woosh down the curly red slide.

With a special soft play area for tiny tots, colourful Edu-blocks for tactile play time and squishy bean bags too!

From the beautiful surfacing scheme, to the murals on the wall and the themed buildings constructed from timber, Greenspan delivered this 'fit out' as a turnkey project.

Ayr crafts.

Haven worked with Greenspan to create a new concept for an indoor FEC at one of their 'park of the future' projects Craig Tara Holiday Park, in Ayr.

We created a seaside village themed indoor play and activity space, which included a role play 'Lifeboat', 'Lighthouse' play structure, and themed activity spaces including a 'Boathouse' stage and performance area, a sensory room and other supervised activity rooms, for science, cooking and craft related activities.

The combination of beautifully designed wall and floor graphics, and authentic theming to the activity room facades went down extremely well with the client and the guests.

Village play.

The perfect marriage of our play and theming expertise. We were delighted to explore our ramshackle side in designing this Farm Village themed indoor play area!

With a labyrinth of farm buildings and barns to scamper through, a role play street, tudor cottages and even a sensory-zone church for toddlers, Amerton Farm takes themed indoor play to a new level.

Ropebridges, nets and trapeze rings, crates to clamber up, multiple levels inside barns, and authentic detailing.

Just add water.

Greenspan worked together with Haven, and the architect Space and Place to deliver some very attractive theming within a refurbished pool complex at Seashore Holiday park, in Great Yarmouth.

From faux timber cladding panels, on the walls, to artificial rocks and foliage, Beach hut facades, bespoke driftwood sculptures, and beautifully crafted signs, Greenspan were able to take on the whole theming package as a turnkey project.

Dining out!

Center Parcs briefed Greenspan Projects to create a concept play area as part of the refurbishment of Hucks, their popular family friendly American Diner.

As well as in keeping with the all-American style, it needed to be fun, interactive, challenging and entertaining.

The result is a rustic wooden adventure play with a Route 66 theme. Rope ladders and nets provide opportunities to climb, while a high up water tank, and ramshackle buildings make excellent hiding places.

Artificial grass on the floor provides a soft landing and adds the natural feel.

Safari hotel reception!

As part of the rebrand Greenspan were engaged to redesign the reception of the main hotel.

We transformed this space from Holiday Inn standard to a safari base camp complete with tented roof lining, interactive explorer wall maps, timber themed reception counters and even an iguana enclosure nestled amongst a higgledy-piggledy stack of packing cases.

Works included design, themed carpentry, interactives, lighting, canvass tent theming, scenic artwork, flooring and animal enclosure construction.

Sleeping gruff!

Working closely with Chessington's creative teams and the Gruffalo IP team, we designed and fitted out a number of themed hotel rooms.

This included specialist decorating works, printed wallpaper, printed carpets, theming, interactive games, artificial trees and foliage, fibreglass Props, TV surround theming and bathroom fitouts.

Dreams are made of this.

Working closely with Legoland creative teams and architects, we designed and fitted out a number of Ninjago themed hotel rooms.

This included specialist decorating works, printed wallpaper, printed carpets, theming, interactive games, Lego built props, TV surround theming and bathroom fitouts.

Putting the glam in the camp.

Explorer glamping at Chessington allows little explorers to have the adventure of sleeping under canvas in the 'great outdoors'. Greenspan's team undertook a detailed design process to work closely with the park and understand the vision.

We then sourced a selection of premium tents, created themed furnishings to provide the perfect comfortable and cosy environment in which to bed down in after a fun filled day in the theme park.

Situated next to Wild Asia, our new Explorer Glamping site includes 31 standard tents, complete with a double bed and 2 singles, 4 Premium tents, for a little bit of extra luxury and a themed family restaurant.

Our works consisted of design, groundworks, service connections, toilet block construction, pathways, theming and fencing.

CONCEPT DESIGN

See the wood for the trees.

Greenspan won the opportunity to design and build a truly unique and mystical play structure to be installed deep in a woodland at Greenwood Forest Park.

The play structure is designed as a large Giant King, who has descended from his throne in Snowdonia, and fallen asleep in Greenwood Forest. Climb into his mouth, up into his crown, and slide down one of his horns...but dare you wake him?

This project will open in 2020, watch this space!

GREENSPAN

1. Entrance portal
2. Kiosk
3. Toilets and changing rooms
4. Body dryers station
5. Seating area
6. Sand and water play area
7. Water playground

Ship ahoy!

Greenspan were appointed by a Local Authority to design a Large Outdoor play, Water Play and Splashpad.

They approached Greenspan, as they felt we were better placed to consider the whole design more holistically as opposed to the negative experience they had found working with conventional water play suppliers, who were limited to 'off the shelf' designs rather than creating a unique theme that fitted with the clients vision.

Watch this space as the project develops...!

Conceptual design has been carried out for a high end 5* Resort in Cyprus. Currently in negotiation before proceeding to technical drawing stage.

Greenspan have been working with a UK based zoo attraction to master plan, design and build this stunning animal exhibit.

It includes many themed and interactive elements to deliver the most immersive experience for guests.

Greenspan were employed on this large scheme to undertake the concept and master planning.

This is part of a 3 phase expansion project at a large and highly popular crocodile farm.

The project comprises of many exciting and interactive play elements. All the play activities are located around and in amongst themed dangerous animal enclosures.

The scheme is still in early stages and further designs and concept will be made available once ready.

This large fairytale themed adventure park has many elements and areas to capture and entertain many age groups.

1. Large indoor adventure play
2. Large themed outdoor adventure play areas
3. Trampoline cushions
4. Splash park, with sand and water play
5. Adventure golf
6. Jump slide zone
7. Pump track
8. Low ropes trail

Create a unique standalone, 'drive to' attraction designed to thrill and excite with high intensity activities available such as: High ropes, Bouncing Nets, Zip Coaster, Zip Wire and Climbing.

It will have the potential to be fully covered in bad weather, creating the 'UK's largest undercover Adrenaline Park.'

The attraction will appeal to a variety of demographics, heavily focussing on the 'family friendly' vibe and offerings. In addition to the thrilling activities, large play features with bridges, towers, slides, sandplay and serious waterplay will really make this park a unique, one of a kind attraction.

Greenspan has been working on this conceptual design for a brand new family attraction centre in the UK.

The area is to include an mixed variety of activities for varying ages and skill levels.

This is a first stage development with plan to extend and develop the park further in years to come. The project will include a large indoor play that breaks through to the outdoors, large enchanted castle themed outdoor adventure play area, wishing well play area, go-kart tracks, sand and water play and much more.

Signed-off concept design and planning permission received for this Adventure Golf course for Duffryn Bach golf academy.

This themed Adventure golf course has many features. Crashed life size plane, full size safari Land Rover with photo opportunities, large water feature with ride-on raft and much more.

This is for 1 x 18-hole course with a 9-hole DDA compliant course with in it. This allows for wheel chair and buggy users to join in and have fun with the rest of the family.

This project is for a large international entertainment chain.

This indoor adventure playground is to be constructed inside an area of the hotel as part of a Family Entertainment Centre.

The structure is packed with play value, with multiple play towers, slides, bouncing nets, climbing opportunities, interactive elements plus much more.

This project for a large independent Holiday Resort in west Wales, is now nearing completion.

This scheme is for a themed adventure golf along with a high ropes course and elements of play.

Along with this we are installing a large outdoor dining area over looking the activity areas and surrounding valley.

This family ropes course is part of a much larger scheme.

Due to Non Disclosure Agreements we are unable to share any further informations other than the location and this initial design concept.

Forest adventure play ground for Centre Parcs Europe.

Includes many activities from stainless steel tube slides, climbing nets and tunnels, balance activities, swings, themed areas and more.

This project is for an indoor adventure golf course, themed around an enchanted or secret garden.

It is to be installed for a large individual prestige garden centre in the UK.

The course features 18-holes with a large amount of theming, attention to detail and excellent playability.

This course has been designed to give users a completely fun unique experience away from the business of everyday life.

This large outdoor adventure play park has been developed for a Large Zoological park in Belgium. To be built in amongst the trees, with some of the play towers over spilling in to nearby water.

The area include multiple play elements

1. Multiple slides
2. Various climbing towers and connections
3. Look out points
4. Rope tunnels, climbing nets and bridges
5. Balance beams and board walks
6. Swings and seating
7. Hard and soft landscaping
8. Mild levels of theming

Master planning a medium to large project for one the UK's largest garden centre chains.

This project will include a large 18 hole adventure golf with high ropes situated above the course.

A large sand and water play area has also been included that interlinks with the water feature that runs through the Adventure Golf.
